

Assembly Bill 1011

Ann Prichard

Sr. Environmental Research Scientist

May 1, 2006

AB 1011 Background

- Effective January 1, 2006
- Three main areas of focus:
 1. Pesticide Broker Licensing.
 2. Pesticides can be registered based on evaluations of previously submitted data, regardless of ownership (FAC 12811.5).
 3. Concurrent acceptance of all new active ingredients (FAC 12836).

Changes Impacting Registration

- A letter of authorization is no longer required by the Department.

Note:

- The data requirements have not changed.
- Data cost sharing may be required.

Changes Impacting Registration

- The Department will accept all new active ingredient applications concurrently with submission to the U.S. Environmental Protection Agency.

What Do These Changes Mean to the Registration Branch?

- No longer involved in data protection.
- A change in how we process submissions.
- Less review of non-new active ingredient product data.
- Potential increase in new active ingredient submissions.

What Does This Mean to Our Stakeholders?

- Increased preparation before submission of non-new active ingredient applications.
- Faster turn around time by the Department for most new product (non-new active ingredient) and amendment submissions.
- Company bears all responsibility for working out data cost sharing.
